Missing certificate
v1 signature: False
v2 signature: False
v3 signature: False
v4 signature: False

≔ APPLICATION PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.HIGH_SAMPLING_RATE_SENSORS	normal	Access higher sampling rate sensor data	Allows an app to access sensor data with a sampling rate greater than 200 Hz.
android.permission.INTERNET	normal	full Internet access	Allows an application to create network sockets.
android.permission.SYSTEM_ALERT_WINDOW	dangerous	display system-level alerts	Allows an application to show system-alert windows. Malicious applications can take over the entire screen of the phone.
android.permission.VIBRATE	normal	control vibrator	Allows the application to control the vibrator.
android.permission.DETECT_SCREEN_CAPTURE	normal	notifies when a screen capture of the app's windows is attempted.	Allows an application to get notified when a screen capture of its windows is attempted.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.
android.permission.USE_BIOMETRIC	normal	allows use of device-supported biometric modalities.	Allows an app to use device supported biometric modalities.
android.permission.USE_FINGERPRINT	normal	allow use of fingerprint	This constant was deprecated in API level 28. Applications should request USE_BIOMETRIC instead.
android.permission.WAKE_LOCK	normal	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
android.permission.RECEIVE_BOOT_COMPLETED	normal	automatically start at boot	Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running.
android.permission.FOREGROUND_SERVICE	normal	enables regular apps to use Service.startForeground.	Allows a regular application to use Service.startForeground.
com.kpmg.us.digital.gateway.mobile.pent01.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION	unknown	Unknown permission	Unknown permission from android reference
com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE	normal	permission defined by google	A custom permission defined by Google.

🔍 MANIFEST ANALYSIS

HIGH: **1** | WARNING: **4** | INFO: **0** | SUPPRESSED: **0**

NO	ISSUE	SEVERITY	DESCRIPTION
1	App can be installed on a vulnerable upatched Android version Android 7.0, [minSdk=24]	high	This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version => 10, API 29 to receive reasonable security updates.
2	Content Provider (expo.modules.clipboard.ClipboardFileProvider) is not Protected. [android:exported=true]	warning	A Content Provider is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
3	Service (androidx.work.impl.background.systemjob.SystemJobService) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.BIND_JOB_SERVICE [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.

NO	ISSUE	SEVERITY	DESCRIPTION
4	Broadcast Receiver (androidx.work.impl.diagnostics.DiagnosticsReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
5	Broadcast Receiver (androidx.profileinstaller.ProfileInstallReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.DUMP [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.

⚑ SHARED LIBRARY BINARY ANALYSIS

NO	SHARED OBJECT	NX	PIE	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED

NO	SHARED OBJECT	NX	PIE	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED
1	x86_64/libreanimated.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	Dynamic Shared Object (DSO) info The shared object is build with -fPIC flag which enables Position independent code. This makes Return Oriented Programming (ROP) attacks much more difficult to execute reliably.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	True info The binary has the following fortified functions: ['__strlen_chk']	True info Symbols are stripped.

NO	SHARED OBJECT	NX	PIE	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED
2	x86_64/libandroidx.graphics.path.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.	Dynamic Shared Object (DSO) info The shared object is build with -fPIC flag which enables Position independent code. This makes Return Oriented Programming (ROP) attacks much more difficult to execute reliably.	True info This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.	Full RELRO info This shared object has full RELRO enabled. RELRO ensures that the GOT cannot be overwritten in vulnerable ELF binaries. In Full RELRO, the entire GOT (.got and .got.plt both) is marked as read-only.	None info The binary does not have run-time search path or RPATH set.	None info The binary does not have RUNPATH set.	False warning The binary does not have any fortified functions. Fortified functions provides buffer overflow checks against glibc's commons insecure functions like strcpy, gets etc. Use the compiler option -D_FORTIFY_SOURCE=2 to fortify functions. This check is not applicable for Dart/Flutter libraries.	True info Symbols are stripped.

NO	SHARED OBJECT	NX	PIE	STACK CANARY	RELRO	RPATH	RUNPATH	FORTIFY	SYMBOLS STRIPPED
3	x86_64/libhermes.so	True info The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable. 00022	Open a file from given absolute path of the file	file	G0/k.java K0/c.java Q0/a.java X5/m.java d0/C1196a.java g0/C1381b.java w6/AbstractC2386K.java
00161	Perform accessibility service action on accessibility node info	accessibility service	F/A.java
00173	Get bounds in screen of an AccessibilityNodeInfo and perform action	accessibility service	F/A.java
00079	Hide the current app's icon	evasion	z0/g.java
00013	Read file and put it into a stream	file	E0/b.java F2/a.java H5/a.java X5/m.java X8/r.java Z0/a.java b7/AbstractC0954m.java b7/AbstractC0956o.java c9/c.java com/rnmaps/maps/AsyncTaskC1161a.java com/rnmaps/maps/k.java com/rnmaps/maps/v.java d0/c.java i4/C1479E.java i4/C1492g.java
00028	Read file from assets directory	file	i4/C1488c.java

RULE ID	BEHAVIOUR	LABEL	FILES
00036	Get resource file from res/raw directory	reflection	E5/e.java X5/m.java com/rnmaps/maps/C1164d.java com/rnmaps/maps/l.java expo/modules/av/player/b.java i4/C1479E.java j4/AbstractC1583Q.java
00162	Create InetSocketAddress object and connecting to it	socket	S8/b.java S8/j.java
00163	Create new Socket and connecting to it	socket	S8/b.java S8/j.java
00187	Query a URI and check the result	collection sms calllog calendar	N/d.java
00077	Read sensitive data(SMS, CALLLOG, etc)	collection sms calllog calendar	N/b.java N/d.java
00063	Implicit intent(view a web page, make a phone call, etc.)	control	E5/e.java P6/b.java P6/k.java X5/m.java s4/j0.java
00051	Implicit intent(view a web page, make a phone call, etc.) via setData	control	E5/e.java P6/b.java P6/k.java s4/j0.java
00014	Read file into a stream and put it into a JSON object	file	F2/a.java
00096	Connect to a URL and set request method	command network	i4/C1505t.java
00089	Connect to a URL and receive input stream from the server	command network	i4/C1505t.java m5/n.java

RULE ID	BEHAVIOUR	LABEL	FILES
00030	Connect to the remote server through the given URL	network	i4/C1505t.java
00109	Connect to a URL and get the response code	network command	i4/C1505t.java m5/n.java
00094	Connect to a URL and read data from it	command network	J4/I.java com/rnmaps/maps/v.java i4/C1505t.java
00108	Read the input stream from given URL	network command	i4/C1505t.java
00114	Create a secure socket connection to the proxy address	network command	N8/f.java
00001	Initialize bitmap object and compress data (e.g. JPEG) into bitmap object	camera	com/rnmaps/maps/v.java expo/modules/clipboard/a.java
00026	Method reflection	reflection	B7/C0481a.java B7/C0482b.java
00132	Query The ISO country code	telephony collection	j4/AbstractC1583Q.java
00121	Create a directory	file command	X5/m.java expo/modules/av/AVManager.java
00024	Write file after Base64 decoding	reflection file	X5/m.java
00012	Read data and put it into a buffer stream	file	X5/m.java
00125	Check if the given file path exist	file	X5/m.java
00104	Check if the given path is directory	file	X5/m.java expo/modules/av/AVManager.java
00080	Save recorded audio/video to a file	record file	expo/modules/av/AVManager.java

RULE ID	BEHAVIOUR	LABEL	FILES
00101	Initialize recorder	record	expo/modules/av/AVManager.java
00199	Stop recording and release recording resources	record	expo/modules/av/AVManager.java
00198	Initialize the recorder and start recording	record	expo/modules/av/AVManager.java
00136	Stop recording	record command	expo/modules/av/AVManager.java
00194	Set the audio source (MIC) and recorded file format	record	expo/modules/av/AVManager.java
00090	Set recroded audio/video file format	record	expo/modules/av/AVManager.java
00197	Set the audio encoder and initialize the recorder	record	expo/modules/av/AVManager.java
00102	Set the phone speaker on	command	expo/modules/av/AVManager.java
00138	Set the audio source (MIC)	record	expo/modules/av/AVManager.java
00196	Set the recorded file format and output path	record file	expo/modules/av/AVManager.java
00133	Start recording	record command	expo/modules/av/AVManager.java
00041	Save recorded audio/video to file	record	expo/modules/av/AVManager.java

⁙⁙ ABUSED PERMISSIONS

TYPE	MATCHES	PERMISSIONS
Malware Permissions	6/25	android.permission.INTERNET, android.permission.SYSTEM_ALERT_WINDOW, android.permission.VIBRATE, android.permission.ACCESS_NETWORK_STATE, android.permission.WAKE_LOCK, android.permission.RECEIVE_BOOT_COMPLETED
Other Common Permissions	2/44	android.permission.FOREGROUND_SERVICE, com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE

Malware Permissions:

Top permissions that are widely abused by known malware.

Other Common Permissions:

Permissions that are commonly abused by known malware.
